## Trademarks & Registered Trademarks

Products and product names mentioned in this document may be trademarks or registered trademarks of their respective owners.

## Release & Document Numbering

Enghouse products follow a standard product release numbering scheme such as release 1.0 for the first release of a product and then 1.1 and 1.2 and so on for updates to this release until the next product release of 2.0 reached.

The document numbering scheme follows the same format as above but carries an additional number to indicate where edits or changes have been made to documents. For example the first Product Description for release 1.0 of a product would be 1.0.0. If this document is changed, the version becomes 1.0.1, indicating the next version of the document. This document numbering scheme can be broken down as follows:

# Revision History

| Version | Date | Author | **Modifications** |
|---|---|---|---|
| 1.0.0 | October 2025 | Jinny Support | Initial version |

# 1 About.

This document aims to provide the steps to assist Enghouse engineer's how to increase max MMS size for MM1,MM4 and MM7.

# 2 THE PROCEDURES.

## 2.1 The procedures applied to MMSC's and LB's.

1. **Backup current mmsc.ini**

   *cd /home/jinny/mmsc/init*

   *cp mmsc.ini mmsc.ini.20261105*

2. **Edit the following parameters inside mmsc.ini.**

   *[mmsc]*

   *max_mms_msg_size= 3145728*
   *max_mm1_msg_size= 3145728*

   *[mm4_rx]*

   *MaxMailSize= 3145728*

   *[mm4_router]*

   *MaxMailsize=3145728*

3. **Restart apache**

   *systemctl restart apache.service*

   *ps -ef | grep "apache\|httpd"*

4. **Restart mm4_rx**

   *systemctl restart mmsc.mm4rx.service*

   *ps -ef | grep mm4_rx*

5. **Verify no error after the changed.**

   *Check all logs*

# 3 SERVICE IMPACT ANALYST.

MMS service will be unavailable when httpd is restarted.

# 4 DOWNTIME.

Approximately 5-10 minutes

# 5 VERIFICATION.

Send 3MB MMS through all channels (mm1, mm4, mm7):

# 6 ROLLBACK.

1. **Revert back the changed inside mmsc.ini and restart apache.**

   *systemctl restart apache.service*
